

FOR IMMEDIATE RELEASE:

D&M Plastics Medical Parts Production in Billions
Spotlight on Experience and Precision

BURLINGTON, IL (FEBRUARY 4, 2016) – D&M Plastics, a specialist in tight-tolerance precision parts for the medical and electronics industries, will bring their expertise to MD&M West, Anaheim Convention Center, Anaheim, CA, Feb. 9-11, 2016, Booth #467.

Since opening in 1972, D&M has produced and shipped more than 6 billion parts, with 4.8 billion precision parts for the medical industry and 1.4 billion medical devices manufactured and shipped.

“The medical industry has found a true partner in D&M,” says President Peyton “Chip” Owen, who will attend the show. “The more complex and challenging the part is to produce, the more they should be working with D&M.”

D&M was the first U.S. full-service turnkey manufacturer awarded ISO-certification in 1993 and the company’s long-standing external defect rate is 17-PPM’s – which is 60-times better than the industry average.

D&M Plastics has provided its customers a comprehensive guarantee of quality, delivery, and price since it was founded in 1972. The D&M manufacturing team stands behind its customer goals and outcomes, and has more than 300 combined years of injection molding experience. D&M is a privately held company, located in Burlington, Illinois just outside of Chicago. For more information, visit on the web <http://www.dmplastics.com>, or call (847) 683-2054.
