

FOR IMMEDIATE RELEASE:

D&M Plastics Provides Precision Solutions for Medical Industry

BURLINGTON, IL (OCT. 15, 2015) -- In an industry as exacting as the production of medical devices, demand for perfection is high. D&M Plastics specializes in tight-tolerance precision parts for the medical and electronics industries. The company's long-standing external defect rate of 17-PPM's is 10-times less than the industry average, and D&M was the first U.S. full-service turnkey manufacturer awarded ISO-certification in 1993. D&M will bring their precision contract manufacturing prowess to MedTech World's MD&M show, November 4-5, 2015 at the Minneapolis Convention Center, Minneapolis, MN, Booth #1263.

Precision is paramount to President Peyton "Chip" Owen, who describes D&M as a 'technology company' saying, "We're able to work with customers at the concept stage of production by offering them an innovative and sophisticated manufacturing solution that is highly-engineered, and based on technology."

D&M added the expertise of Sales and Marketing Manager Marc Jaker to their team earlier this year, in a move that has further enhances the company's ability to meet and exceed the rigorous production standards which the medical device industry demands. An industry veteran with more than 35 years experience in medical and specialty product development and technical sales, Mr. Jaker holds many U.S. and E.U. Patents as well as FDA 510K Medical Device approvals. He calls D&M's PPM rate, 'statistically flawless.' Jaker will join the D&M team at Booth #1263 at the Minneapolis show, and invites customers looking for a solution to a complex manufacturing problem to bring their challenges to the D&M team.

Since its founding in 1972, D&M Plastics has provided its customers a comprehensive guarantee of quality, delivery, and price. The D&M manufacturing team stands behind its customer goals and outcomes, and has more than 300 combined years of injection molding experience. D&M is a privately held company, located in Burlington, Illinois just outside of Chicago. For more information, visit on the web <http://www.dmplastics.com>, or call (847) 683-2054.
